Hi Stephanie- Give me a buzz when you get a chance, I want to make sure I am understanding your question. Are you thinking of specific venting events or specific equipment that vents?

Amy

Subject: RE: Analyst Question

Hi Amy,

Can I ask you one more question, this might be sort of sophomoric but why didn't EPA's 2016 NSPS include venting and flaring? Sorry if this is a dumb question!

Thanks,
Stephanie

Thank you so much for your time on the phone and putting these links together. It is much appreciated!

Many thanks,

Stephanie

Hi Amy,

Gave you a ring but we seemed to have missed you – might there be another time that works for you this afternoon?

Best,
Adina

Hi Amy,

Thank you for the call! Our analysts will get back to you tomorrow morning at 11:30 AM ET. If that time doesn't work, feel free to suggest another time.

Best,
Adina

Subject: Fwd: Analyst Question

Hi Amy-

Thanks so much for responding so quickly on your first day back! Thanks also for sending us the link to the regulatory developments that are currently on deck, it's really helpful.

We are trying to get smarter about the proposed revisions to the NSPS for methane emissions from oil and gas operations. One area of confusion for me is how and whether those rules overlap with the BLM Waste Prevention Rule. Could you or one of your colleagues at EPA possibly chat with me about that issue at a high-level?

We're not looking for any non-public information just trying to better understand the rules that are in the public domain and whether and how there could be any regulatory overlap. Any help with this would be much appreciated! There's probably a bit of a backlog for all of you guys to get through after

the shut down so I promise to be very respectful of your time - a quick chat for 7 to 10 minutes would be terrific.

Thanks very much,

Stephanie

Hi Adina-

Karen Marsh forwarded me your email. EPA's current public regulatory agenda lists all the regulations EPA is currently working on. It can be found here:
https://www.reginfo.gov/public/do/eAgendaMain?operation=OPERATION_GET_AGENCY_RULE_LIST¤tPub=true&agencyCode=&showStage=active&agencyCd=2000.

Regards,

Amy

Subject: Analyst Question

Good Afternoon Ms. Marsh,

I work for Capstone, a policy analysis firm based in DC. You may know my colleague, Stephanie Grumet, she worked with you a few years ago. I am reaching out because we are trying to help our institutional investor clients make sustainable choices and decisions that are most likely to be compatible with eventual federal methane regulations. We understand the NSPS for oil and gas industry for methane regulations was re-proposed in September, 2018.

Usually, once new sources are regulated, the Agency develops regulations for existing sources. We are hoping to chat with someone at EPA about whether or not EPA has made any announcement about a follow-on existing source regulation for methane emissions from the oil and gas sector. Any general information on this issue would be greatly appreciated. Might you or one of your colleagues have a few minutes to chat sometime this week or next? We would greatly appreciate your time.

Kindly,

Adina
